

INSTRUMENT TECHNOLOGY, INC.

MODEL 176110 Reverse Peephole Scope

Features:

- Enables observation through ordinary Peephole
- Hand-held
- Can couple to ITI Video Adapter or Night Vision Pocket Scope

View a room from in front of a closed door: the ITI Reverse Peep-hole Scope allows reverse visual observation when placed on a conventional door peephole lens.

Quick, tactical or covert viewing means no more guesswork about who or what will answer the door. Designed for maximum resolution, portability, and fast setup; an adapter enables video documentation.
